ou	[u]	
ö	[ø]	
u	[u] [ʊ]	before or after a vowel
ui	[ui] [ʊi]	word-initially and after <c'h>, <g>, <q> and <s>
ü	[y]	
y	<i>several</i>	only used in loanwords; pronunciation depends on language of origin

Analogously to the consonants, vowel clusters that are not supposed to be pronounced together are broken up with an interpunct (·), or alternatively an apostrophe ('): co·aliziun / co'aliziun [ko.ali'tsiū] (instead of *coaliziun [koali'tsiū]).

Alternatively, if the cluster contains <e> or <i>, it can be broken up using a trema (‘): *Réuniziun* / *Re·uniziun* / *Re‘uniziun* [re.uni̇tsjū] (instead of **Reuniziun* [r̄uni̇tsjū]).

The names of the letters of the alphabet are as follows:

A a [a], **B** be [be], **C** tze [tse], **D** de [de], **D** eð [eð], **E** e [e], **F** ef [ef], **G** ge [ge], **H** hal [hau̇] or *hasch* [haʃ], **I** i [i], **J** txotă ['ʒotə], **K** ka [ka], **L** ell [el], **M** em [em], **N** en [en], **O** o [o], **P** pe [pe], **Q** cü [ky], **R** er [er], **S** es [es], **T** te [te], **U** u [u], **V** ve [ve], **W** ve *Tütsch* [ve tytʃ], **X** üx [yks], **Y** üpsilon ['ypsilon], **Z** tzet [tset], **Þ** þorn [θorn]

1.3. Stress

If no syllable has a stress mark, the primary stress of the word falls on the final syllable that has a vowel with an umlaut or ring (ä, å, ö, ü) or which is followed by a consonant, after ignoring the endings -s, -en(s), -ent(s), -er(s), -esch(en), -eu(x), -ica(s), -ică(s), -ic(i), -(esch)laiset(s), -lor, -mint(s), -p(h)äts and -sqåb(s) in case it has one of those. In the context of this rule, semivocalic <i> and <u> as well as <e> following <a> are counted as consonants.

Irregular stress is marked with an accute accent ('). If the irregular stress falls on a word-final vowel, it is marked with a grave accent (`). Vowels that already have a diacritic cannot receive a stress mark (see 1.5.).

In words where the stress rule fails to determine stress, it falls on the first syllable: *mici* ['mitʃi], *ricăs* ['rikəs].

Optional final stress in third person singular future forms of verbs is not marked: *amarha* [a'maʃə ~ ama'sa], *façarha* [fa'saʃə ~ fasa'sa]. If final stress is not optional, it is marked as usual: *ischă* [i'sa].

The following words can be optionally stressed on the first syllable: *azul* [a'zu ~ 'azu], *acest* [a'tʃest ~ 'atʃest], *vidar* [vi'ðaʃ ~ 'viðəʃ], *embù* [em'bu ~ 'embu].

2. Nouns

2.1. Definite articles

	singular	plural
masculine	el, l' ^{A)}	els
feminine	la, l' ^{A)}	las

^{A)} Elided form.

The noun *ma* can become *mha* when preceded by the feminine singular definite article.

	singular		plural	
	masculine	feminine	masculine	feminine
à		àl		àls
da	del	dal	dels, dallas ^{A)}	dals, dallas ^{A)}

^{A)} Rare.

2.2. Indefinite articles

	singular		plural	
masculine	ün	'n ^{A)}	dels	dallas ^{B)}
feminine	ünä		dals	

^{A)} Colloquial form.

^{B)} Rare except with year numbers.

	masculine singular	feminine singular
à	à'iens	à'iensa
c'e [tʃe]	c'e'n [tʃen]	
come	com'iens	com'iensa
contra	contr'iens	contr'iensa
da	d'iens	d'iensa
intra	intr'iens	intr'iensa
ja	ja'iens	ja'iensa
per	pr'iens	pr'iensa

2.3. Regular pluralisation

- *First declension*: nouns that lack any characteristic ending receive -s.
 - nouns ending in a stressed vowel receive -ns. If the noun ends in a stressed [a], one can alternatively add -es.
 - the final consonant -/ [...] ~ (silent)] and the ending -il [...] become i before -s is added.
 - the endings -ar and -an become -ae before -s is added.
 - nouns ending in the sounds [s z ſ ʒ tʃ dʒ λ n θ] receive -en.
 - Greek nouns ending in -sis change it to -ses.

- *Second declension*: nouns ending in *-eu* or *-éu* receive *-x*.
- *Third declension*: nouns ending in *-äCs* or *-äCCs*, where “C” stands for any consonant, receive *-il* or *-or*.
- *Fourth declension*: nouns ending in *-ic* or *-íc* [...ik] receive *-i*.
 - nouns ending in *-ic* [...ik] can receive either *-i* or *-s*.
- *Fifth declension*: nouns ending in *-x*, *-sc* or *-scu* change it to *-schi*.

A pluralised noun retains the stress of the singular form, except in the following cases:

- A noun that is stressed on the antepenult and receives *-en* in the plural moves the stress to the penult in the plural.
- All third declension nouns move the stress to the antepenult in the plural.

2.4. Irregular pluralisation

singular	plural
el caciun	els cician
el cióvec	els cioveci [tʃo'veitʃ]
el garda	els garxhi
la fru	las frulor
el fungu	els funxhi
el luïç	els luïça
el po	els pocs
la politicà	las politicäs, els politici

3. Adjectives and adverbs

3.1. Regular gender inflection

- Adjectives ending in *-eu* or *-éu* change them to *-ă* and *-éă* respectively in their feminine form.
- Adjectives ending in *-ceu* [...tʃiu] or *-cheu* [...kiu] change them to *-ciă* [...tʃə] and *-că* [...kə] respectively in their feminine form.
- Adjectives ending in *-at* change it to *-adă* in their feminine form.
- Adjectives ending in *-esc* change it to *-ească* in their feminine form.
- Adjectives ending in *-a* change it to *-ă* in their feminine form.
- In all other cases, the masculine and feminine forms are identical.

3.2. Regular pluralisation

The pluralisation rules for adjectives are identical to those for nouns (see 2.3.).

3.3. Irregular adjective forms

singular		plural			
masculine	feminine	masculine	feminine		
aucün					
acest	această	acestilor [a'tʃestʃələr]			
acü	acütă	acüns	acütäs		
bel	belă	bels	beläs		
ben	bună	bens	bunäs		
bléu	bluă	bléux	bluäs		
cacsa	cacsă	cacsa	cacsă		
çaobén					
embù					
Européu	Europeiă	Européux	Europeiäs		
fiir		fiis			
ingen					
negreu	neagră	negreux	neagräs		
nigüt	nigüdă	nigüts	nigüdäs		
noveu	noua	nouveux	nouäs		
nü	nüdă	nüns	nüdäs		
po		pocs			
political		politici, politicais			
próxim	próximă	próxins	próximäs		
prüm	prümă	prüms	prümäs		
quálsevol		quáisevois			
qetevri					
qissen					
quist		quisten			
timit	timidă	timits	timidäs		
vell	veă	vells	veäs		
viens	viensă	dels	dals		

The adjectives *Belxhíc*, *evanxhelíc*, *matxentíc*, *öcümeníc* and *püblíc* shift the stress to the antepenult in the plural.

3.4. Adverbialisation of adjectives

To adverbialise an adjective, add the ending *-mint* to its feminine form.

4. Pronouns

4.1. Personal pronouns

5.3. Verbs in inverted word order

In inverted word order, the verb ending elides with the personal pronoun:

- éu elides with the endings -éu and -eu to -'éu.
- tu elides with the ending -ás to -ás't.
- o [u] and a combine with the ending -a to -a-t-o [...a'tu] and -a-t-a [...a'ta] respectively.
- In all other cases, the pronoun is hyphenated to the end of the verb without further change.

In any case, the added pronoun receives the stress of the word.

6.2. Ordinal numbers

Ordinals are formed by adding *-laiset* to the numeral (exception: *viens > pirmalaiset*).

That ending's abbreviation is *-l:t* or *-:t*. Alternate forms for ordinals are as follows:

<u>alternate ordinals</u>	units	teens	tens
0	nuléu, -éă	bisquintéu, -éă	---
1	prüm(ă)	ündeschéu, -éă	---
2	secund	dudeschéu, -éă	vaintschéu/veintéu, -éă
3	tiercéu, -éă	treideschéu, -éă	treincéu, -éă
4	quartéu, -éă	tordeschéu, -éă	quareincéu, -éă
5	quintéu, -éă	quinteschéu, -éă	simeincéu, -éă
6	sextéu, -éă	sedeschéu, -éă	sexeincéu, -éă
7	seiftéu, -éă [saɪf...]	seifdeschéu, -éă [saɪfdəʃ]	seifeincéu, -éă [saɪ'feɪns]
8	vuitéu, -éă [vui...]	vuideschéu, -éă [vuiðəʃ]	vuieincéu, -éă [vui.'eɪns]
9	nonéu, -éă	undaveintéu, -éă	noueincéu, -éă

Alternate forms for bigger values are formed by adding -éu / -éă directly to the stem.

These forms are abbreviated by the numeral followed by the last consonant of the stem and the -éu / -éă ending (*sextéu* > 6:téu, *treideschéu* > 13:schéu, *simeincéu* > 50:céu), Irregular abbreviations are *prüm(ă)* > 1:m(ă) and *secund* > 2:nd.

6.3. Miscellaneous miscellany

- The preposition *à* becomes *àð* before a vowel. It elides with *acest*, *această*, *acestilor* [a'festʃələr] and *aici* to *à'cest*, *à'ceastă*, *à'cestilor* [a'festʃələr] and *à'içi* respectively. It must elide with the definite and indefinite articles (see 2.1. and 2.2.).
- The preposition *da* becomes either *d'* or *dað* before a vowel. It must elide with the definite and indefinite articles (see 2.1. and 2.2.).
- *dove* elides with *(tu) isch* and *(o/a/ça) isch* to *dovestás* and *dovestă* respectively.
- *hi* elides with *isch* and *sint* to *ja* and *j'ont* respectively.
- The conjunction *qe* becomes *q'* before a vowel.
- The pronouns *qet* and *qi* elide with *isch* to *qet'st* and *qi'st* respectively.
